Ideation Phase
Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-3942
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Project Problem Statements:

Employee records reach the organisation as Excel spreadsheets. They have to be moved into ServiceNow accurately, without duplicates, and then made visible to the people who use them.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator	load employee details (Employee ID, Name, Email, Department, Location) from a spreadsheet into ServiceNow	typing hundreds of rows into forms by hand is slow and easy to get wrong	the data arrives in bulk and its columns must line up with the fields of a ServiceNow table	frustrated and unsure that the final records are accurate
PS-2	An HR / data administrator	re-import an updated spreadsheet and keep every employee record correct	the same employee can be created twice when a file is imported again	nothing tells the import which column identifies an existing employee	worried about the quality and reliability of the employee data
PS-3	An HR manager	see how employees are spread across departments and locations	the imported data is only a long list of rows	no report or dashboard has been built on top of the imported table	uninformed and unable to answer questions quickly
